

## High Reliability Board Connectors with RC Springprobe™ Technology

# RC CONNECT-R™

Replace traditional spring pin or 'pogo' style connectors with robust, cost-effective solutions from Ardent Concepts

Test & Measurement    Military    Industrial    Medical    Automotive    Communications

### High-Performance Molded Compression Mount Connectors

Ardent Concepts, Inc., the Innovator in high frequency compliant interconnect technology, has developed the RC Connect-R line of interposers and space transformers to address the demand for lower cost alternatives to expensive legacy technologies. This all-meal, scalable, solderless connector technology is available in standard configuration with 2 week lead times at a fraction of the price of other compression mount connectors. RC Connect-R products are scalable, offer exceptional AC performance, and can drop in and replace many existing z-axis connectors.

Wafer Probe Interface    LGA Interposers    High Frequency Connectors    Board-to-Board

Multi-GHz Signal Performance

Extremely Short Signal Path

Excellent Mechanical Robustness

Solderless Compression Mount

Consistent DC Resistance

Cost Effective
